do not buy it, the balls go through too fast and you can not place them precisely. the music may well be good and the gameplay to, but the first two points screw up the fun and relaxation. I have no problem losing a game but it does not always make fun.

Update 1 the combo system does not work always to . I'll try it a few more times, but after just over 4 hours in the game I just managed the first level. (and i am not bad in this kinde of games) So far, it is a frustrating relaxing game for me. Update 2 ok it has now his own categorie in my steam library it calls pice of sh. Update 3 OK I got it. 100% after 19 hours. it is possible but it was not fun. If you are just looking for a relaxing game, you should not buy it, but if you are looking for a challenge, you should try it out.. i love this game its theu2665u2665u2665u2665u2665u2665 i love how it takes me 5.8 hrs to complete 3 levels i also love how easy the achivemants are to get its just an easy flex on my homies i have fell in love with a 68 cent game i even gifted it to mates its that good but they wont install it i think its cause they think there to good or have better games to play i have found myself playing more inca marble than my \$80 dollor assassin creed game that i got for \$40 these days 10/10 if you can afford it its better than that zuma game
